

Minisymposium: Glycobiology at the LUMC and beyond

Date: Friday July 5
Time: 09:00 – 12:00 AM
Location: LUMC, Lecture hall 3

Glycobiology is becoming increasingly important in the majority of fundamental and translation biomedical research topics. Glycans play essential roles involved in many biological processes in cardiovascular biology, immunology, cancer and infectious diseases. To highlight and discuss outstanding glycobiology research activities by LUMC and its collaborators we like to welcome you to participate and interact with us at the minisymposium: "Glycobiology at the LUMC and beyond"

The program will include keynote lectures by outstanding experts in the field, as well as by young promising researchers.

For our program and free registration, please visit the following link:

<https://forms.lumc.nl/lumc2/GlycobiologySymposium> (Registration closes on July 3, 2019)

Symposium organizers:
Prof. dr. M. Wuhrer (Center for Proteomics and Metabolomics)
Prof. dr. C.H. Hokke (Parasitology)

For questions, please contact: s.j.duivesteijn@lumc.nl
